Aditya Yadav
Sujal Lama

Introduction

Background

Netflix is one of the world's largest streaming platforms, offering thousands of movies and TV shows across different countries and genres.

The rapid growth of streaming services has changed how audiences consume entertainment worldwide.

Why This Matters

Analyzing Netflix content can help identify:

- Trends in content production
- Genre popularity over time
- Global distribution patterns
- Shifts in audience preferences

Source: Hallinan & Striphas (2016). New Media & Society, 18(1), 117–137.

Problem Statement

Netflix hosts a large, diverse collection of content — but the underlying patterns are not always visible.

Key Questions This Project Will Answer:

Q1 Which countries contribute the most content to Netflix?

Q2 Which genres are the most common across movies and TV shows?

Q3 How has Netflix content volume changed over time?

Q4 What patterns exist between content type, rating, and duration?

This project aims to analyze Netflix content data to identify meaningful patterns and trends.

Project Objectives

To analyze Netflix content and identify trends, patterns, and relationships within the dataset.

Specific Objectives

01 Explore distribution of movies vs TV shows

02 Analyze content production by country

03 Examine trends in content releases over time

04 Identify the most common genres

05 Perform statistical analysis to support findings

Dataset & Methodology

Dataset

Netflix Titles Dataset

Source: Kaggle – Netflix Movies and TV Shows Dataset

Variables include:

- Title
- Type (Movie / TV Show)
- Country
- Release Year
- Genre
- Rating
- Duration

Methodology

01 **Data Cleaning**

Handle missing values, remove duplicates, fix data types

02 **Exploratory Data Analysis**

Distributions, trends, groupings

03 **Visualization**

Charts, graphs, and plots

04 **Statistical Analysis**

Descriptive stats, hypothesis testing

05 **Interpretation**

Draw conclusions and insights

Planned Analysis

01 Content Type

Movies vs TV Shows
distribution

02 Release Trends

Content releases
by year over time

03 Country Analysis

Top content-producing
countries

04 Genre Analysis

Most common genres
across the platform

05 Rating Analysis

Distribution of
content ratings

06 Visualizations

Bar · Histogram · Pie
Box Plot · Trend

Group Work Division

1 Sahil Khan

- Data Collection & Verification
- Literature Review & Background Research
- Exploratory Data Analysis (EDA)
- Statistical Analysis & Hypothesis Testing
- Report Writing & Documentation

2 Aditya Yadav

- Data Cleaning & Preprocessing
- Visualizations (charts, graphs, plots)
- Country & Genre Analysis
- Presentation Slide Design
- Final Report Review

3 Sujal Lama

- Content Type Distribution Analysis
- Rating Analysis
- Supporting Visualizations
- Project Documentation
- References & Bibliography

Shared Tasks: Presentation Preparation · Final Report Review · Project Documentation

Expected Outcomes

1 Content Trends

Identify major Netflix content trends across movies and TV shows over the years.

2 Global Distribution

Understand how content production is distributed across different countries.

3 Genre & Rating Patterns

Determine the most common genres and how content ratings are distributed.

4 Data-Driven Insights

Generate meaningful insights backed by statistical analysis and visualizations.
